IMPROVED USER EXPERIENCE

Surprisingly small, the Minipresso NS2 is 5cm shorter than the previous generation. You will hardly notice it in your handbag, backpack, or even your back pocket. This state-of-the-art portable espresso brewer features our latest patented pumping system, resulting from years of innovation, for maximum extraction efficiency. The fully integrated water tank simplifies the preparation steps, and the added drip tray keeps the mess out of the equation. With the Minipresso NS2, we took care of every aspect of the espresso brewing to make your coffee moment an unforgettable and fun experience!

NEW LOOK, SAME GREAT TASTE

By merging our coffee expertise and engineering know-how into a brand new design, we have conceived our most compact and capable capsule espresso machine yet. Our new Minipresso NS2 combines ease of use, durable materials, and a polished aesthetic to help you brew perfect espresso every time.

EXTRA COMPACT

Minipresso NS2 is 30% shorter than the previous generation. It's the smallest and most alluring capsule espresso machine available on the market, barely standing over the height of 4 capsules.

Overall length

129 mm / 5.07 in

EVEN LIGHTER

The Minipresso NS2 makes your road to adventure more practical by significantly shrinking its overall weight without compromising its robustness. A perfect fit for outdoor enthusiasts who want to travel light.

Weight

290 g / 0.64 lb

minipresso | NS2

MORE ERGONOMIC

Besides creating a unique personality, the new squircle profile offers a superior grip to hold the brewer and manipulate the water tank lid. The extra large piston makes the pumping action even more comfortable and smooth.

Max pressure:

18 Bar / 261 PSI

ECO CONSCIOUS

Sustainably designed with wheat-composed polymers, the Minipresso NS2 conception is a step forward to a greener future. Entirely hand-powered, the Minipresso NS2 does not require electricity to operate.

Outer shell:

30% Biomass Material

COOL TOUCH

Its double wall structure ensures good thermal isolation, a synonym of a comfortable handling, even after a preheating cycle. Minipresso NS2 features an extra large built-in water tank, ideal for extracting up to 60ml single espressos.

Water capacity:

80 ml / 2.73 oz
